

## Eitzenberger GmbH Expands into Taiwan!

Sales network in Asia with successful market entry in Taiwan

Wessobrunn, 20 October 2024 - Eitzenberger GmbH, a leading manufacturer of air bearings, linear and rotary axes and complex kinematics, is proud to announce its successful market entry in Taiwan. Since its foundation in 2001 by Dr Hans Eitzenberger, the German company, known for its high-precision systems and strong engineering expertise, has developed into an important OEM supplier in various high-tech industries.

Since mid-October 2024, Eitzenberger has been represented in Taiwan by DAICHIN TECHNOLOGY under the management of Jacky Chiang. Like many of our sales partners, DAICHIN TECHNOLOGY is active in the photonics and optics industry and also brings valuable experience in coordinate measuring technology, including the handling of air bearings.

Wolfram Meyer, Head of Business Development at Eitzenberger, commented: 'We are delighted to be working with DAICHIN TECHNOLOGY. Their extensive expertise and strong network in the region will help us to successfully establish our high precision systems in Taiwan. This cooperation is another important step in our strategy to expand our sales network in Asia, one of the most dynamic growth regions in the world.'

Asia is an important growth region for Eitzenberger, where the demand for high-precision and reliable technologies is constantly increasing. By expanding its sales network in Taiwan, Eitzenberger strengthens its presence in Asia and builds on its previous successes in other Asian markets.

Eitzenberger GmbH thanks DAICHIN TECHNOLOGY for the successful start in the Taiwanese market and looks forward to a fruitful and future-oriented cooperation.
